

ATMOsphere Network EuroShop 2020

ABOUT THE EVENT

ATMOsphere Network comes to EuroShop to introduce the new era of sustainable retail! Sponsored by Life-C4R; an EU-funded project under grant agreement n° LIFE 17 CCM/IT/000120.

The afternoon will include an exciting Keynote Presentation, special results from Life-C4R, and an interactive session for the audience to get involved. This will be followed by a networking cocktail.

As the world's leading retail trade show, EuroShop is an important barometer of future developments in the retail trade. The ATMO Network events will focus on the advantages, importance to climate change, and technological developments related to natural refrigerants globally and will provide a unique opportunity to share best practices with experts in an informal framework.

The events are targeted towards retailers, industry and policy decision-makers who are looking for technologically viable, safe and efficient alternatives to HFCs for commercial refrigeration applications.

The Life-C4R project has received funding from the European Union under grant agreement n° LIFE 17 CCM/IT /000120

EXCLUSIVE SPONSOR & HOST

LIFE C4R will demonstrate the feasibility and efficiency of innovative technological solutions for the commercial refrigeration sector that are able to reduce the GHG (greenhouse gas) emissions and particularly HFCs.

The main targets of the project are :

To develop a technology that allows a minimum of 10% energy savings in commercial refrigerating plant in any country, with any external temperature

To prove the possibility to completely substitute HCFC and HFC with CO₂ in any climate or market condition
